

R.P. ADAMS REFURBISHMENT PROGRAM

New Strainer

Refurbished Strainer

Inside and Out — You Won't Be Able to Tell Them Apart.

Your R.P. Adams product has provided years of reliable service. Yet, now may be the time to evaluate alternatives, which will ensure optimal performance of your equipment.

R.P. Adams' innovative Refurbishment Program will provide solutions so you can make the best decision to avoid unanticipated process interruptions.

Refurbishment Program Benefits

- ▶ Your unit will be restored to "like new" condition.
- ▶ Significant savings compared to the cost of purchasing a new unit.
- ▶ Refurbishing is a maintenance cost, not a capital expense.
- ▶ Fully warranted for one year.

How the R.P. Adams Refurbishment Program Works

Once your unit is received at our factory, it will be thoroughly evaluated for a modest inspection fee. We then provide a written report detailing the refurbishment, which includes replacing worn parts, along with an estimate of the costs involved. You will also be advised if a full replacement is recommended.

If you proceed with the refurbishment or choose to purchase a new unit within 30 days, 50% of the inspection fee will be applied to cost of either.

For complete details on this program, as well as other R.P. Adams products, contact your representative listed below or our factory.

We are proudly represented in your area by:
